**Welcome to Production Contractors Inc.!** At PCI our goal is simple, we want to be your outdoor creative products company. We know it can be difficult and costly to find a qualified and reputable company. Everything we do at PCI has you, the customer, in mind. Our skilled, knowledgeable staff provides prompt, courteous, and professional service from the time you call for a quote to our follow up inspection once our work is complete. To protect your investment we apply only the best materials at or above the manufacturers recommended specifications. Our work is backed with a three year warranty on all local jobs. We make our products from Portland cement based materials so even on the products we ship worldwide the wetter and nastier the weather gets, the stronger and better they cure – just like freeways and bridges. We are not only concerned with the quality of our work, but also the customer's overall satisfaction. We take pride in our work so that you can take pride in your home. Let us make your interior or exterior project a pleasant experience.

## Outdoor BBQ Kitchens and Fireplaces

by Production Contractors Inc.

**Come home to an Island Paradise in your own backyard!**

**We are now specializing in outdoor ready built kitchens, fireplaces, and fire pits that look custom built when they are installed.**

**Years of experience has shown us how to carefully engineer them to allow almost instant installation without any extra costs like cranes or large crews. Any homeowner can install them with a helper. They are built in sections and fit together. These unique systems now allow shipping by common carrier to any customer worldwide or delivered locally and setup.**

**We offer any grill or accessory supplied by you or us or by you, or we can make them to fit yours. Even the latest trend to wrap them around your roll-in free-standing grill purchased at one of the mass retailers.**
